### **To the project**

The family of my grandfather lived in Tcherkasovo by Kaluga 170 km away from Moscow. The father of my grandfather fell in the Second world war and we have only a letter from him and an photo. I spent every summer in our village in a blue house. But since my grandmother passed away we had to build a new one, nice, but alien. This is a personal story about how I tried to reconcile the both houses and to find my place.
